Software Engineer | LendingTree

Cover letter

Hi LendingTree Insurance team,

I call myself a technomancer because technology has felt like magic to me since I was a kid, especially when the result makes a messy task feel simple. Your opening caught my attention because it puts that work in both new and existing software. I like building a feature, but I also like figuring out why one production workflow keeps letting users down.

At NuPrice, I built a web application that turned marketplace data and customer rules into pricing decisions. Supporting it meant tracing bad pricing results back to the input, the rule or the application. On Proofmark, I worked across the React UI, PostgreSQL, APIs and webhook flows so routing and verification had clear states to troubleshoot.

My strongest stack is TypeScript and PostgreSQL. I’d bring the same approach to building, testing and supporting integrations while ramping into your C# and .NET codebase. I’m based in Colorado and comfortable working with the Denver team in person.

Thanks,
Chad Koslovsky
